Experience

Store Clerk

July 2023 - August 2025

I have worked on and off for a few years in between my studies as a store clerk. I had experience working as a cashier and helping and organizing the store.

Projects

Pacolization

May 2026

Developed in C# a localization tool for Unity Engine with a diverse team of programmers, diligently collaborating and working together with my team and also making several architectural and design suggestions that led to a noticeable performance optimizations.

Custodio de Babel

January 2023 - June 2023

Developed and programmed several of the game's mechanics in C# using Unity Engine and reliably worked in a team environment to ensure the completion of the game within a set deadline.
